

Green is Good

Growth Opportunities In Building and Real Estate

The Women's Council of REALTORS®  Brings You
An Overview—The Greening of Residential Real Estate

As the demand for green grows, so does the need to understand sustainable materials, energy efficient technologies and green ratings. Learn to identify green living designs for your buyers who value sustainability. Identify and highlight these features on your listings.

Learn to spot green washing (over exaggerating.)

Green building is expected to double by the year 2013, representing new opportunities for those in the know.

Info about NAR's Green Designation and class schedule will be available.

Ask how you can help!
